

Required Readings

- Read the overview ["Chrome DevTools"](#)

CSS Flexbox Layout

- Read Chapter 10, part 1 ["Flexbox"](#)—*HTML5 & CSS3 for the Real World* text
- Watch SitePoint Premium screencasts—["What is Flexbox"](#)
- Browse one layout issue that interests you at ["Solved" by Flexbox](#)
- Fork or play with this example navigation bar layout comparison between float, inline-block, and flex. It is recommended that you create your own, free account in codepen and use it as a collaborative resource.

CSS Grid Layout

- Read page 1 of Eric A. Meyer's [Grid Layout in CSS](#) to get an overview of the purpose and status of the CSS Grid Layout specification.
- Read from Mozilla Developer Network - ["Basic concepts of grid layout"](#)
- Watch  ["Defining a Grid"](#)
- Watch  ["The fr unit"](#)

Currently CSS Grid is **not** well supported in the mobile environment. To review the current status of CSS Grid browser support visit <http://caniuse.com/#feat=css-grid>.
